## Message from Acting Dean CMNHS – Dr. Donald Wilson

### Fulfilling FNU Vision and Mission through Learning Commons & Library Activities Initiatives

The College of Medicine, Nursing & Health Sciences (CMNHS) supports the Fiji's National University's (FNU) efforts in the creation of Learning Commons to ensure its students and staff have access to and take advantage of knowledge and information sources and formats via relevant sustainable technology. Using its strong partnerships with like-minded technical and academic institutions, our students and staff now have a myriad of opportunities to access learning and teaching as well as research information unheard of before. Additionally, learning, teaching and research using this new approach promises to be more enlightening and empowering while heightening/encouraging opportunities for social and economic growth through creative innovation and open/free cross-fertilization of knowledge and information internally (between and amongst students, staff), as well as externally, with like-minded partners.

The College (as in other Colleges of the University) is offering training sessions from within the institution and School libraries related to use and easy access to knowledge, information and research data from both, physical and digital libraries, repositories and international Commons with such unprecedented volume, variety and value never before realized.

The development of learning commons such as the provision of dedicated physical and e-resources and peer discussion sites within its Libraries is evidence of the College's continued focus and commitment on the delivery of the 5 core areas of its strategic plan 2018 – 2020. These in turn are directly related to fulfilling FNU's vision to be recognised as a key driver of Fiji's economic prosperity and especially its mission which is to support the economic and social development of Fiji through relevant, high-quality education and training that maximizes graduate employability and applied research that has a positive societal impact.

## Fiji Day Celebration

As Fiji marked its 50 years of independence on 10th October 2020, everyone shared this joyous occasion hyped up in National colour. Different FNU campus libraries shared information about the days during

pre-independence period and after independence through flyers, prints and archived newspapers displayed inside the libraries.

## 'Pinktober' Awareness

FNU campus libraries advocated month of October a breast cancer awareness month by sharing the success stories of breast cancer strength and survivors and educating users on the realities of breast cancer through pictorials, colorful charts and by crafting creative notice boards. There are increasing number of breast cancer patients every year as per the data collated by the Surgical and Pathology Departments at CWM Hospital and as per their data it was said that majority were female and they often refer to medical care at the late stage. Thus, FNU library staff supported breast cancer awareness to break the stereotype amongst women and shared knowledge to seek medical assistance as

breast cancer is curable in the early stages as well as contributed charity funds towards this worthy course.

### Library Opening Hours

Opening hours differs according to the academic calander to give our students maximum access to library. You can find the opening hours on our website:
