UNIVERSITY

# SUSTAINABILITY at FNU

**Sustainability: Pathway to Greener Future** - *"The greatest threat to our planet is the belief that someone else will save it."* – Robert Swan,

Sustainability is the key to a healthy future, which should begin at home for each of us. We must exercise caution in our actions to prevent depriving future generations of the resources they require. Sustainability is the way forward, and how we manage and conserve our resources now will define our future. Therefore, we must shift our thinking away from short-term gain toward long-term

With this, the Division of Capital Projects & Infrastructure would like to acknowledge and recognize the staff of the University's various Division's, College's, School's, and Campus's who have volunteered to serve as Sustainability Champions. These Sustainability Champions are change agents working to make the world a healthier and greener place, and we are proud to have these champions in FNU.

The Sustainability Champions will be the key conduit between the respective sections and the Sustainability Initiatives Committee in achieving the UNSDG Goals.

The universities are required to be champions of Sustainability due to their unique position within society. The critical roles of the universities are providing knowledge and solutions, creating current and future SDG implementers, embodying the principles of SDGs through organizational governance, operations and culture, and providing cross-sectoral leadership in implementation. Therefore, each individual within the university community has a role in ensuring FNU leads the charge in achieving the SDG goals in Fiji and the Pacific.

FNU has become one of the Signatories to the **SDG Accord**.

## Natabua Staff Celebrates World Environment Day at Home

The Natabua Campus staff who amid the pandemic, has made a tremendous initiative to mark World Environment Day. The staff had planted sandalwood and citrus seedlings at homes. The campus was in partnership with the Ministry of Forestry and 30million trees in 15 years initiative (30MT15Y).
