<p><b>5</b></p>	<p>The ECG Made Easy</p> 	<p><b>Author:</b> John R. Hampton</p> <p><b>Edition:</b> 8<sup>th</sup></p> <p><b>Description:</b> Encourages the reader to accept that the ECG is easy to understand and that its use is just a natural extension of taking the patient's history and performing a physical examination. This title directs users of the electrocardiogram to straightforward and accurate identification of normal and abnormal ECG patterns.</p> <p><b>Location-</b> FSN [5 copies], Pasifika [30 copies], TCL [5 copies]</p> <p><b>OPAC Link:</b> <a href="#">Click Here</a></p>	<p><b>CMNHS</b></p>
<p><b>6</b></p>	<p>Clinical Anatomy by Regions</p> 	<p><b>Author:</b> Richard S. Snell</p> <p><b>Edition:</b> 9<sup>th</sup></p> <p><b>Description:</b> For medical, dental, allied health, and nursing programs, this book guides students through the fundamentals of human anatomy, explaining the how and why behind each structure, and offering readers the hands-on guidance they need to make sound clinical choices. Organized by body region from surface to deep structures, this new edition features: Updated design and layout allowing for a shorter, more focused text. Basic Clinical Anatomy sections with essential information on gross anatomic structures of clinical significance.</p> <p><b>Location-</b> Pasifika [12 copies], TCL [5 copies], FSN [5 copies]</p> <p><b>OPAC Link:</b> <a href="#">Click Here</a></p>	<p><b>CMNHS</b></p>

<p>7</p>	<p>Bates' Guide to Physical Examination and History Taking</p> 	<p><b>Author:</b> Lynn S Bickley, Peter G Szilagyi, Richard M Hoffman.</p> <p><b>Edition:</b> 12<sup>th</sup></p> <p><b>Description:</b> Bates' Guide to Physical Examination and History Taking is designed for medical, physician assistant, nurse practitioner, and other students who are learning to interview patients, perform their physical examination, and apply clinical reasoning and shared decision making to their assessment and plan, based on a sound understanding of clinical evidence. The twelfth edition has many new features to facilitate student learning. As with previous editions, these changes spring from three sources: the feedback and reviews of students, teachers, and faculty; our commitment to making the book easier to read and more efficient to use; and the abundant new evidence that supports the techniques of examination, interviewing, and health promotion.</p> <p><b>Location-</b> Pasifika [25 copies]</p> <p><b>OPAC Link:</b> <a href="#">Click Here</a></p>	<p><b>CMNHS</b></p>
<p>8</p>	<p>Evidence-based Medicine Toolkit</p> 	<p><b>Author:</b> Douglas Badenoch, Carl Heneghan</p> <p><b>Edition:</b> 2<sup>nd</sup></p> <p><b>Description:</b> This bestselling pocket guide to the skills of evidence-based medicine succeeds in demystifying the terminology and processes in a handy and easy-to-follow format, all within the space of 100 pages. With an improved layout, this second edition of Evidence-based Medicine Toolkit offers more up-to-date guidance as well as new sections on important areas of research. New features of this second edition include: A box for each major database showing how to search the evidence, and highlighting the differences between them Flow charts for different study types New critical appraisal sections on qual.</p> <p><b>Location-</b> Pasifika [28 copies], FSN [12 copies]</p> <p><b>OPAC Link:</b> <a href="#">Click Here</a></p>	<p><b>CMNHS</b></p>

<p><b>9</b></p>	<p>Basic and Clinical Pharmacology</p> 	<p><b>Editor:</b> Bertram G. Katzung, Anthony J. Trevor</p> <p><b>Edition:</b> 13<sup>th</sup></p> <p><b>Description:</b> Organized to reflect the course sequence in many pharmacology courses and in integrated curricula, Basic &amp; Clinical Pharmacology covers the important concepts students need to know about the science of pharmacology and its application to clinical practice. Selection of the subject matter and order of its presentation are based on the authors' many years of experience in teaching this material to thousands of medical, pharmacy, dental, podiatry, nursing, and other health science students. Coverage that spans every aspect of medical pharmacology, including botanicals and over-the-counter drugs, and pharmacogenomics with examples. Emphasis is placed on discussion of drug groups and prototypes. Includes sections that specifically address the clinical choice and use of drugs in patients and the monitoring of their effects.</p> <p><b>Location-</b> Pasifika [40 copies]</p> <p><b>OPAC Link:</b> <a href="#">Click Here</a></p>	<p><b>CMNHS</b></p>
<p><b>10</b></p>	<p>Oxford Handbook of Clinical Specialties</p> 	<p><b>Author:</b> Andrew Baldwin, Nina Hjelde, Charlotte Goumalatsou, Gil Myers</p> <p><b>Edition:</b> 10<sup>th</sup></p> <p><b>Description:</b> Covering each of the fourteen core medical specialties, the tenth edition of the Oxford Handbook of Clinical Specialties is the must-have reference guide to each of the specialties you will encounter through your medical school and Foundation Programme rotations. Now updated with the latest guidelines, and developed by a new and trusted author team who have contemporary experience of life on the wards, this unique resource presents the content in a concise and logical way, giving clear advice on clinical management and offering insight into holistic care.</p> <p><b>Location-</b> Pasifika [24 copies], FSN [10 copies], TCL [5 copies]</p>	<p><b>CMNHS</b></p>

11	Davidson's Principles and Practice of Medicine  	<p><b>Editor:</b> Brian R. Walker, Nicki R. Colledge, Stuart H. Ralston, Ian Penman</p> <p><b>Edition:</b> 22<sup>nd</sup></p> <p><b>Description:</b> Davidson's provides the factual knowledge required to practise medicine, explaining it in the context of underlying principles, basic science and research evidence, and shows how to apply this knowledge to the management of patients who present with problems rather than specific diseases. The underlying principles of medicine are described concisely in the first part of the book, and the detailed practice of medicine within each sub-specialty is described in later system-based chapters. Most chapters begin with a two-page overview of the important elements of the clinical examination, including a manikin to illustrate the key steps in the examination of the relevant system. A practical, problem-based clinical approach is described in the 'Presenting Problems' sections, to complement the detailed descriptions of each disease. The text is extensively illustrated, with over 1000 diagrams, clinical photographs, and radiology and pathology images. 1350 text boxes present information in a way suitable for revision, including 150 clinical evidence boxes summarising the results of systematic reviews and randomised controlled trials and 65 'In Old Age' boxes highlighting important aspects of medical practice in the older population. A combined index and glossary of medical acronyms contains over 10 000 subject entries.</p> <p><b>Location-</b> Pasifika [22 copies]</p> <p><b>OPAC Link:</b> <a href="#">Click Here</a></p>	CMNHS

<p>12</p>	<p>Drug Doses</p> 	<p><b>Author:</b> Frank Shann</p> <p><b>Edition:</b> 17<sup>th</sup></p> <p><b>Description:</b> The booklet includes the dose of every drug commonly prescribed for systemic use in both adults and children, except for diagnostic agents. The booklet does not list the side effects of drugs, indications for their use, or modifications for renal or hepatic failure.</p> <p><b>Location-</b> Pasifika [12 copies]</p> <p><b>OPAC Link:</b> <a href="#">Click Here</a></p>	<p>CMNHS</p>
<p>13</p>	<p>Ghai Essential Pediatrics</p> 	<p><b>Editor:</b> Vinod K. Paul, Arvind Bagga</p> <p><b>Edition:</b> 8<sup>th</sup></p> <p><b>Description:</b> For over three decades Ghai Essential Pediatrics has been a widely-trusted resource for undergraduate and postgraduate students of pediatrics.
