PRASAD TRANSFORMS OBSTACLES INTO STEPPING STONES OF SUCCESS

FNU ANTHEM ECHOES THE NEW FNU VISION
FNU – Contributing to national progress

FNU envisions a Fiji where education is not just a privilege but a fundamental right, accessible to all segments of society. This inclusive vision aligns with the national agenda of fostering equity and social development.

Appointment as VC

I am filled with gratitude and a deep sense of honour after being appointed as the new Vice-Chancellor of our esteemed Fiji National University.

I would like to express my heartfelt thanks to the selection committee, the FNU Council, and all those involved in the rigorous selection process for bestowing upon me this great responsibility.

I look forward to the challenge of becoming the leading dual-sector university in the Pacific by serving the people, economy and society of Fiji and the wider Pacific region.

This can be achieved by providing quality and accessible education and training for employability, producing relevant and real-world research, becoming champions of sustainability, and providing our students with the best possible learning experience.

I look forward to serving with humility and optimism and to Fijians around the globe. Christmas is a time of warm wishes to each member of our FNU community.

Vice-Chancellor Professor Unaisi Nabobo-Baba (fourth from front row) with FNU Council Members, and Senior Leadership Team during the welcoming ceremony.

Balavineaka

As the newly appointed Vice-Chancellor of the Fiji National University (FNU) I am deeply honoured to write a message for the month of December edition of the FNUNIKUA theme, “Vision to Victory.” This theme encapsulates the essence of your educational pursuit and the transformative journey you embarked upon when you first set foot on our campuses across nationwide.

Fiji National University stands as a beacon of educational excellence, embodying a vision that transcends mere academic pursuits. The institution’s overarching vision is intricately woven into the fabric of the nation, and it resonates with the theme “Vision to Victory” as it strives to lead the way in shaping Fiji’s intellectual landscape.

As the national university, FNU plays a pivotal role in addressing the unique challenges and opportunities facing Fiji. The institution envisons a future where its graduates are not just contributors to the workforce but catalysts for sustainable development. “Vision to Victory” underscores the transformative impact education can have on individuals and society, serving as a driving force behind the nation’s progress.

Bula vinaka

Vice-Chancellor Professor Unaisi Nabobo-Baba

Christmas Message

It is Christmas Season! The season to share Love and Good Tidings to all our families and communities! As we gather on this joyous occasion of Christmas, I extend warm wishes to each member of our FNU community and to Fijians around the globe. Christmas is a time of reflection, gratitude, and the celebration of the birth of Jesus Christ, whose message of hope and love continues to inspire us!

In closing, remember that your victory is not just an individual accomplishment; it is a contribution to the collective progress of our society.

I wish everyone a safe and enjoyable holiday and look forward to seeing you studying at FNU in the new academic year.

Vinaka

Professor Unaisi Nabobo-Baba
Vice-Chancellor
Chief Guests’ Graduation Messages

“’The Fiji National University continues to play an important role in educating health care workers for Fiji and the region. The significant representation of females, constituting approximately 75% of the student body at the College of Medicine, Nursing, and Health Sciences (CMNHS), reflects a growing trend of women actively pursuing careers in health service. This is a noteworthy achievement and highlights the University’s commitment to fostering diversity, while aligning itself with the United Nations’ Sustainable Development Goal 5 of achieving gender equality and empowering all women and girls. By providing opportunities for female students to excel in health service-related education, CMNHS is contributing to our overall effort to create a more equitable and inclusive society, that provides equal opportunities for everyone, and fostering a balanced and diverse healthcare workforce.”

Honourable Atonio Rabici Lalabalavu
Minister for Health and Medical Services
Chief Guest – College of Medicine, Nursing and Health Sciences (CMNHS) graduation

“’ Nelson Mandela’s words resonate profoundly in this moment: ‘Education is the most powerful weapon which you can use to change the world.’ Graduates, you now wield this powerful weapon, and it is your responsibility to use it wisely. As you embark on your respective journeys, I encourage you to reflect on the values upon which FNU was founded. Let your actions reflect not just your knowledge, but your integrity, compassion, and commitment to serving others. Use your skills to uplift communities, create opportunities, and contribute to the prosperity of our nation.”

Honourable Filimoni Vosarogo
Chief Guest – College of Agriculture, Fisheries and Forestry (CAFF), and College of Business, Hospitality and Tourism Studies (CBHTS) graduation

“The Fiji National University (FNU) anthem was launched at the newly appointed Vice-Chancellor’s traditional welcoming ceremony earlier this month. The anthem was composed by Lasarusa Daveta and reflected the vision and mission of FNU as not only Fiji’s premier higher education and TVET education provider but also the entire Pacific region. FNU Vice-Chancellor, Professor Unaisi Nabobo-Baba highlighted how the new anthem was inextricably linked to FNU’s Strategic Plan 2024-2026. ‘We are a young and vibrant university, and we needed a song that resonated that emotion,’ said the Vice-Chancellor.

“The new anthem perfectly sums up what we want to be as a University: different colleges, programmes, and courses that enhance the skills and knowledge that our students possess.” She added that the song reflected the University’s goal to shape futures and help students from across the world who attend the university realise their dreams. “We are preparing our students to become ambassadors of their nations as well as our university to the world!” said Professor Nabobo-Baba.

“We are a multicultural university; we are where the Pacific combines into a beautiful melting pot of culture and tradition, and this song showcases that aspect of FNU as well.” The Vice-Chancellor added that FNU aims to become the best higher education and TVET education provider in the Pacific region.

The new FNU anthem was also sung at the 2023 December graduation ceremony.

The new Fiji National University (FNU) anthem Echoes the New FNU Vision

Chorus: Fiji National University
Shaping our futures and realising our dreams
On our journey, we learn in harmony. We are one, no matter what colour or creed.
FNU is the place for you and me.

Verse 1: Under Pacific skies
Our home is land by the sea.
We are people of the sun. We are Pacific in Fiji.
FNU is the place for you and me.

Verse 2: 14 provinces we hail from 3 confederacies to which we belong.
Above the seas and beyond FNU is still growing strong.
FNU is the place for you and me.

Verse 3: Different colleges, programmes, and courses To enhance our skills and knowledge
You’ve prepared us well to serve.
FNU is the place for you and me.

Verse 4: You gave us wings to fly.
To soar up high in the sky.
Now, in our garlands and gowns, we smile.
FNU You made it worth our while.

Chorus: Shaping our futures and realising our dreams
On our journey, we learn in harmony.
FNU is the place for you and me.
FNU is the place for you and me (2x).
Fiji National University.
In a world where screens blur the horizon and voices echo through wires, Captain Apenisa Kubuicakau exists in a different realm. His classroom is the vast ocean; his teachers are the whispering wind and the roaring storm. Kubuicakau, a graduate of Fiji National University's (FNU), Fiji Maritime Academy (FMA), attained a Diploma in Nautical Science (Level 5) during the recent FNU graduation ceremony.

“Staying away from your home and loved ones is the most difficult thing in the lives of seafarers,” Kubuicakau said. “The longest I have not seen my family is 18 months, and it was quite a trying time as families are the strength and your pillar of support.”

“I am proud and happy to have graduated after the challenging path of studying and working as I have been doing the programme for the past seven years. I started my career with Captain Cook Cruises, where I worked for four years before joining Interlink.”

The 25-year-old, who is originally from Lau, said he was passionate about serving people, and his seven-year education journey at FNU had been a wonderful experience.

“I am so happy to finally graduate this year! FNU’s stuff have been very helpful and are always there to guide us if we come across any obstacles,” he said.

His diploma, a hard-won treasure, is more than just paper. It’s a testament to resilience, a map leading him towards further horizons. Kubuicakau said he planned to undertake the Watchkeeper course next.

Vaea added that he planned to utilise the skills and education he has attained at FNU in Tuvalu to inspire other people to pursue an education that enhanced their skills and improved their lives.

“The Tuvalu Government sponsored me to study engineering at FNU and I am so thankful that I took up the opportunity.”

“The practical and industry attachments offered by FNU ensure that students have all the needed skills for a successful career or further education.

“While there were some challenges, such as the pandemic, my friends and family were helpful, and my lecturers were always ready to assist whenever possible,” said Vaea.

Tulimanu’s sister, Kaveiga Selena Tokasi Vaea, also graduated with a Bachelor of Pharmacy from FNU’s College of Medicine, Nursing and Health Sciences (CMNHS) a day before his graduation.

“Our family is grateful for the education provided by FNU, and we look forward to celebrating our achievements with them.”

Vaea will be pursuing further studies in engineering at a university in Australia with funding from the Tuvaluan Government.

Apply Now

Interested students can apply now for Semester 1, 2024 studies via the FNU website at https://www.fnu.ac.fj/student/ or by email at admission@fnu.ac.fj.

For further information or queries, students can also text (toll-free) to 857 for Vodafone and Inkk users.

Alternatively, applicants can visit any of the FNU campuses to submit applications.
Tabua encourages Women Advancement in STEM

In the latter part of 2022, Waisea Rasalasea Toganivalu found himself shouldering the responsibilities of both father and mother when his wife embarked on a work assignment in Japan. Balancing the care of his three children, managing his own studies, and organising examination classes for his students at Ratu Sukuna Memorial School (RSMS) became a demanding yet fulfilling task.

Amidst the emotional tapestry of responsibilities, his unwavering dedication painted a portrait of resilience and love. It all paid off earlier this month when Toganivalu graduated from Fiji National University (FNU) with a Bachelor of Education (Specialist in TVET).

“It was a tough journey; towards the end of last year, my wife came down to Fiji to check on a project, I juggled my studies together with being a teacher at RSMS, and I think the Lord that I managed to finish off this year,” said Toganivalu.

“My wife came down to Fiji to check on a project, just in time for my graduation, and I am so glad that she is here now. In the first year of studying, I did four units in my first semester and another four units in the second semester while teaching at the secondary school level.”

“It was really hard for me because I was also taking my practical and clinical attachment.”

Toganivalu also aims to secure a Certificate in First Aid.

“I will further my studies at FNU and focus on First Aid as I am dealing with students and also my children, as it is important for me,” he added.

His advice to youths is that nothing in life came easy and one needed to give their best in anything they did.

“There will be hard times, but they will finally be over someday.”

The Senior Technical Officer for Hydraulics and Wet Fire Protection Services of Irwin Alsop Pacific Pie Limited (IA) scooped the Engineers Fiji Prize for female topper in Bachelor of Engineering.

“I would urge the current and future engineering students to do their respective work attachments earlier during their programme and not to leave it for later once they have completed all the units.”

“They will have a better understanding and hands-on experience in the work field that would assist them with the Engineering concepts being taught in school.”

Tabua began her journey at CEST, formerly known as the Fiji Institute of Technology (FTT), in 2010 when she pursued a Diploma in Civil Engineering. She then undertook the Advanced Diploma in Civil Engineering programme, before completing her Bachelor’s programme this year.

“If you put your mind to it and have the determination and discipline, then you can succeed in general; but it has to come from you; it has to be something that you want to do!” she exclaimed.

Tabua attributed her success to her support system, which includes her husband, who also graduated from Bachelor of Engineering (Civil) with Honours (Upper Second Class), her family, employers, ‘Engineers Fiji’ women, and the Graduate Women Fiji Council members.

Mentoring the next generation of young girls can lead to the advancement of women’s employment in the Science, Technology, Engineering and Mathematics (STEM) fields.

These were the words of Bachelor of Engineering (Civil) with Honours (First Class) graduate Eleni Taubale Tabua.

Tabua joined 448 other graduates from the Fiji National University’s, College of Engineering, Science and Technology (CEST) during the December graduation ceremony.

She intends to play a more active role in promoting lifelong education to improve the status of women and young girls to effect positive change.

“There is a big gap in Women in Leadership when it comes to the building and engineering fields. I would love to take a more active role in promoting Science, Technology, Engineering and Mathematics (STEM) programmes to young girls who are interested in the field, to help, support, and give mentorship, if needed,” said Tabua.

“I like the challenge that building and engineering brings since it is one of the STEM fields that is greatly dominated by males. I always want to go the extra mile to be better than my male counterparts, but maybe it is just in my nature to be competitive.”
Chief’s journey from basketball to agricultural dreams

Throughout his studies at the Fiji National University’s (FNU), College of Agriculture, Forestry and Fisheries (CAFF), John Francis Yee Chief found himself not only immersed in the world of agriculture but also living out a dream beyond the classroom.

The 21-year-old Bachelor of Science in Agriculture student’s dream became a reality when he, alongside a team of exceptional athletes, secured a gold medal for Fiji in basketball at this year’s Pacific Games.

“Representing my country in basketball had always been a life goal and on my bucket list to check-off, but I did not think I would win gold at my very first Pacific Games,” Chief said.

“When that final whistle blew, I honestly had no words, my brain could not comprehend what we had just accomplished.”

“The honour of representing Fiji in basketball has only been given to very few people, so to be a part of that group will always be special to me and something I check forever.”

The former Marist Brother’s High School student with Chinese and part iTaukei heritage, describes his experience at the games in Solomon Islands as surreal and one that he will not forget.

“I was initially supposed to join the School of Nursing but I wanted to learn as much as I could to contribute to the advancement and development of technology in the Solomon Islands,” said Neko.

Speaking at the FNU graduation, the cousins highlighted their excitement at returning home with their spoils after four to five years of hard work and determination in a place they called ‘home away from home.”

Despite being in a new country, the cousins stated that they enjoyed their stay and studies, attributing it to new experiences, new challenges, new friendships, resourceful and accommodating lecturers, and the support of their relatives in Fiji.

The cousins commended FNU for the learning experiences, resources, and accommodating lecturers that provided the enabling environment for them to complete their studies successfully.

They dedicated their achievements to their God, their families back home, and their support network in Fiji and Solomon Island Government for sponsorship.

“I was blessed with the opportunity to be selected to represent my country in a sport that I have loved since I was in Year 8 was already crazy, but being present in Solomon Islands where I got to see the top athletes from each Pacific Island country was pretty hard to believe for the first few days,” he exclaimed.

Chief’s journey into agriculture was not initially the path he envisioned. The COVID-19 pandemic and family influences led him to discover his love for working the land, finding solace and satisfaction in the field.

“No one in my family chose agriculture as a career path, but they do dabble in their own backyard gardens. However, my aunty now has a farm or is developing a farm in Navua, and my family has land in Ra that we are trying to occupy once again with crops.”

“I used to go to our farm in Ra to work during the high school holidays, and that is where I discovered that I enjoy getting my hands dirty and working outside to experience the fruits of my labour.

He further added that FNU’s CAFF not only imparts theoretical knowledge, but offers hands-on experience, preparing students to think innovatively and sustainably in the agricultural landscape.

“My experience at FNU’s Kororivia campus has been great, all my lecturers are kind, helpful, and willing to impart knowledge from their own experience and not just conveying what they have to from the syllabus,” he added.

“All the lecturers had their own way of teaching, whether it was through practical work, storytelling, academic quizzes or model making, and it kept things interesting instead of focusing on a singular mode of learning.”

Solomon Island duo graduate in field of engineering

Philip Jerry Chite and Cecil Bulu Neko, who are first cousins from the Solomon Islands, embarked on a journey for academic advancement at the Fiji National University (FNU) over four years ago. Their pursuit has led to notable achievements.

Chite graduated with a Bachelor of Engineering (Mechanical) with Honours and Neko graduated with a Bachelor of Engineering (Electronics/Instrumentation and Control) with Honours from FNU’s, College of Engineering, Science and Technology (CEST).

Pursuing their programmes away from home was due to the absence of adequate educational facilities and programmes in their fields of interest back home.

“We chose to pursue our engineering degrees at FNU because we do not have well established engineering schools for Bachelor’s programme in the Solomon Islands,” said Chite.

“FNU provided the platform, resources, and technical expertise to assist in our learning.”

Neko’s interest in electronics stemmed from its relevance and growth in the Solomon Islands.

“Electronics is a new technology thriving in my country, and I wanted to learn as much as I could to contribute to the advancement and development of technology in the Solomon Islands,” said Neko.

Despite being in a new country, the cousins stated that they enjoyed their stay and studies, attributing it to new experiences, new challenges, new friendships, resourceful and accommodating lecturers, and the support of their relatives in Fiji.

The cousins commended FNU for the learning experiences, resources, and accommodating lecturers that provided the enabling environment for them to complete their studies successfully.

“They dedicated their achievements to their God, their families back home, and their support network in Fiji and Solomon Island Government for sponsorship.”

Marama graduates with Marine Engineering

Matila Marama is a woman of firsts. She walked alone and bravely in her khaki uniform in a field that is traditionally male-dominated and successfully attained her qualifications.

She was the only female Diploma Marine Engineering (Level 5) student to graduate from Fiji National University’s (FNU), Fiji Maritime Academy (FMA) in the last graduation ceremony.

The 23-year-old from Tonia Village in Tailevu is also the first in her family to become a seafarer; she never actually chose this field; it was luck.”

“I know that there is a misconception when it comes to choosing fields to study that are traditionally male-dominated, but at the end of the day, it is all about being brave and proving yourself—with determination and sacrifice, it is possible.”

Matila Marama (centre).

Matila Marama added that she did not choose the sea, but the sea chose her.

“I was initially supposed to join the School of Nursing to become a nurse, but just before the first semester started, I got a call from FMA that I was accepted to study Marine Engineering.”

“I had applied to study for this programme, but I did not even think that I would be qualified to be accepted. But when they called me before the first week of the semester in 2019, and the academy explained to me all the opportunities available, I finally decided to pursue this path.”

“I continued to study this course at the Maritime Academy, and every day I felt more in love with the course!”

The aspiring marine engineer said her heart sailed with the ocean when she first went for her practical at sea.

“I spent my first sea time at Captain Cook Cruises; it’s a cruise ship, and yes, I love sailing! The first time I sailed, I knew this was something I wanted to keep doing.”

Chief Guest at the graduation ceremony and Minister for Lands and Mineral Resources, Honourable Filimoni Vosaroqe said FMA stands as a beacon of excellence in maritime education.

“The graduates from this institution not only carry the knowledge of the seas but also embody the spirit of resilience and dedication required in this crucial sector,” Honourable Vosaroqe added.

“To the graduates of FMA, the world is indeed a reality when he, alongside a team of each Pacific Island country was pretty hard to believe for the first few days,” he exclaimed.

Chief’s journey into agriculture was not initially the path he envisioned. The COVID-19 pandemic and family influences led him to discover his love for working the land, finding solace and satisfaction in the field.

“No one in my family chose agriculture as a career path, but they do dabble in their own backyard gardens. However, my aunty now has a farm or is developing a farm in Navua, and my family has land in Ra that we are trying to occupy once again with crops.”

“I used to go to our farm in Ra to work during the high school holidays, and that is where I discovered that I enjoy getting my hands dirty and working outside to experience the fruits of my labour.

He further added that FNU’s CAFF not only imparts theoretical knowledge, but offers hands-on experience, preparing students to think innovatively and sustainably in the agricultural landscape.

“My experience at FNU’s Kororivia campus has been great, all my lecturers are kind, helpful, and willing to impart knowledge from their own experience and not just conveying what they have to from the syllabus,” he added.

“All the lecturers had their own way of teaching, whether it was through practical work, storytelling, academic quizzes or model making, and it kept things interesting instead of focusing on a singular mode of learning.”

“The honour of representing Fiji in basketball has only been given to very few people, so to be a part of that group will always be special to me and something I check forever.”

“I was initially supposed to join the School of Nursing but I wanted to learn as much as I could to contribute to the advancement and development of technology in the Solomon Islands,” said Neko.

Speaking at the FNU graduation, the cousins highlighted their excitement at returning home with their spoils after four to five years of hard work and determination in a place they called ‘home away from home.”

Despite being in a new country, the cousins stated that they enjoyed their stay and studies, attributing it to new experiences, new challenges, new friendships, resourceful and accommodating lecturers, and the support of their relatives in Fiji.

The cousins commended FNU for the learning experiences, resources, and accommodating lecturers that provided the enabling environment for them to complete their studies successfully.

They dedicated their achievements to their God, their families back home, and their support network in Fiji and Solomon Island Government for sponsorship. 
Kumar bags TAFE excellence award in leadership and management

TAFE Excellence Award for Advanced Diploma of Leadership and Management recipient, Anendra Kumar is grateful to the Fiji National University (FNU) for making him enhance his leadership capabilities. Among the 63 graduates from FNU’s, National Training and Productivity Centre’s (NTPC) graduation ceremony in December, Kumar enrolled in the Advanced Diploma programme with the aim of advancing his career in the shipping industry.

“This award came as a surprise to me, and I am really honoured to get this surprise excellence award from all the tutors that have helped in making this dream come true. I am grateful to TAFE for giving me such an honorary award!” he said.

Working for Oceania Odyssey, a subsidiary of Fiji Shipping, Kumar manages shipping services in Fiji. He chose the leadership and management programme to fortify his position in the shipping industry, emphasising the desire to maintain and extend his leadership role.

“I chose this programme to build a career in the shipping industry, I want to maintain my leadership and I want to go beyond this, and this course has really helped me in thinking of going ahead.”

The father of two teenagers, who hails from Koronivia in Nausori, draws inspiration from his wife, a high school English teacher, for achieving his leadership aspirations.

“This programme was conducted online, requiring sacrifice of weekends, family and personal time. These sacrifices have paid off, resulting in the prestigious award.”

“FNU as an excellent platform for career development, and I would like to acknowledge the support of my family, colleagues, and lecturers for the encouragement throughout my academic journey.”

The second TAFE Excellence Award in Diploma of IT (Advanced Networking) was awarded to Sunail Sandeep Nair.

Widow of Eight Children Defies All Odds

Strength of a woman! This is the title of a song sung by renowned singer ‘Shaggy’, and a statement that truly describes 40-year-old Kiti Gucaka Karokoliwai.

Karokoliwai’s life was shattered three years ago when she received the devastating news that her companion in life, her husband had passed away.

The journey thereafter was never easy for her, as she had to shoulder the role of father to her eight children while juggling being a teacher.

She has been in the profession for 17 years and is currently teaching at Narure Bethel Baptist Kindergarten, where she has been for the last three years.

With the support of her family, Karokoliwai managed to overcome the challenges along the way and make sacrifices to accomplish her goal, and she did just that.

She recently graduated from Fiji National University’s (FNU), College of Humanities and Education (CHE) with a Bachelor of Education in Early Childhood.

“Today is a very proud day for me, as I have just completed my programme,” she said.

“It took me four to five years to complete the programme as I am an in-service teacher. I lost my husband three years ago, but I am so glad that I have my family’s support, who are the backbone of my success and have supported me all along, especially having eight children.”

She also highlighted that her daily devotion to praying was of utmost importance during her educational journey.

“It is the happiest day of my life, and I thank the Lord for giving me the knowledge, strength, and courage to allow me to complete this,” she added.

“I was just so thankful that my family was there for me from the day my husband died till now; they have been there for me; without them, I wouldn’t be where I am today.”

Karokoliwai aims to do her Masters soon.

Tuinsavusavu paves pathway for women in forestry

Timaima Sovaki Tuinsavusavu began her academic pursuit at the Fiji National University (FNU) with a specialised curriculum in forestry, a Diploma in Tropical Forestry.

She was among 46 graduates from FNU’s, College of Agriculture, Fisheries and Forestry (CAFF) and attributed her achievements to her husband, family, lecturers, and fellow programme students at FNU and Pacific Community.

“Without the sustainable management of our forest and the knowledge specialised in the conservation of our landscape, it would be impossible to mitigate climate change, which is a pressing global issue.”

Upon the completion of her Diploma in 2015, pursuing the Bachelor of Science in Forestry programme was a natural progression.

Tuinsavusavu paid special acknowledgement to her employers, the Pacific Community for equipping her with industry forestry knowledge to provide the best of service in the Pacific.

While her focus post-graduation is on her career, Tuinsavusavu has also set her eyes on pursuing further studies in her field at FNU.
Prasad transforms obstacles into stepping stones of success

Rohit Prasad’s life is a remarkable testament to the transformative power of determination and hard work. From humble beginnings in Nagigi, Labasa – where financial challenges and his father’s illness posed significant obstacles, Prasad’s journey from childhood struggles to graduating with a double major from the Fiji National University’s (FNU) College of Business, Hospitality and Tourism Studies (CBHTS) is an inspiring narrative of resilience.

Background

Born to Amar Prasad and Manjula Wati, Prasad grew up in a middle-class family. His parents, both hardworking individuals, tirelessly provided for their three children, navigating the difficulties that arose when Prasad’s father fell ill in 1996. Despite the hardships, the Prasad family persevered, emphasising the importance of education and a strong work ethic. “Mum supported the family by working on other farms for food, and even though my dad was sick, he continued to work to ensure we had the best,” said Prasad.

“I credit my success to the support and guidance of my parents. They have always been there for me, providing love, encouragement, and the necessary resources to help me achieve my goals. “Their belief in me and their constant motivation has played a significant role in shaping my character and driving me towards success. I am grateful for their unwavering support and the values they have instilled in me.”

Educational

Prasad attended Nagigi Indian School during his primary education and later attended Seaqaqa Central College. Financial constraints prevented him from pursuing his tertiary education immediately after completing his Year 12 studies. Undeterred, Prasad entered the workforce, saving diligently for his education.

The journey to his Bachelor of Commerce in Industrial Relations (IR) and Human Resource Management (HRM) at FNU was marked by relentless determination and sacrifice.

In 2016, he seized the opportunity to enrol in the TAFE programme at FNU with a focus on human resource management. He successfully graduated in 2017.

While working full-time, Prasad pursued his degree at FNU, drawn by the institution’s friendly environment, excellent faculty, and affordable fees. Prasad’s resilience faced a turning point when he met his partner, Karishma Devi. Together, they navigated the challenges of balancing work, studies, and personal commitments.

“I was doing attachment, an evening of three-hour classes, and then the whole night I would drive a taxi. The next morning I would be back again go to work. It continued for two years when I met my partner, Karishma Devi.”

In the face of family adversities, Prasad’s father battled illness for five years before passing away in 2023, the hardworking man continued to persevere, honouring his father’s legacy of hard work and dedication to family.

Career

Prasad began his career as an Executive Support Officer at the Ministry of Foreign Affairs, where he provided crucial administrative support to executives and senior management.

The role involved tasks such as managing calendars, scheduling meetings, coordinating travel arrangements, and preparing various documents and reports.

Following his graduation, Prasad pursued a new opportunity and is currently thriving as an Assistant Programme Officer at the Japan International Cooperation Agency (JICA).

“I have 13 years of working experience, transitioning from the manufacturing industry to the private sector, then to the public sector, and am currently with JICA Fiji as an Assistant Programme Officer.”

“I have earned numerous short course certificates from FNU as well as other organisations I worked in while working and studying full-time, as I have always believed in continuous learning.”

Words of Wisdom

“Embrace a mindset of continuous learning and skill development. In today’s dynamic job market, staying abreast of the latest trends and technologies is crucial,” he shared.

“Seize opportunities for professional growth by participating in workshops, enrolling in online courses, and pursuing relevant certifications. Maintaining a proactive approach to learning not only enhances your skills but also keeps you competitive. Remember, taking that extra step can pave the way for career advancement.”

“Fueled by dreams and goals for both me and my family, I transformed obstacles into stepping stones towards success.”

The FNUNIKUA is a monthly newsletter which aims to promote the University’s activities to the wider community. This newsletter is produced by the Public Relations and Communications team at the Division of Marketing and Communications.
