Placement still available for students to study specialized IT programmes at MG-CEIT

Students enrolling at the Fiji National University.

There has been a growing response from local professionals with IT and Engineering backgrounds to take up specialist IT programmes through the India-Fiji Mahatma Gandhi of Excellence in Information Technology (MG-CEIT) commencing Semester 2.

MG-CEIT has been established by the Centre for Development of Advanced Computing (C-DAC) from India in partnership with the Fiji National University (FNU). The Centre has been set up at Derrick Campus, Samabula following a Memorandum of Understanding (MoU) signed in 2018 between the government of India and FNU.

Head of MG-CEIT, Mukesh Babu said the courses is the first of its kind to be offered in Fiji in terms of the quality and depth of training.

Skills and knowledge gained from the training will provide students with a greater understanding of the latest developments and use of computer software.

Students will be taught under the guidance of experienced staff trained by the Centre for Development of Advanced Computing (C-DAC) from India, which has a proud history in the development of IT, both hardware and software.

According to Babu, the programme will be of great advantage to both new graduates and those already in the workforce.

"This facility will train professionals to be specialists in different areas related to IT. The courses offered are cutting edge and is far different then what is being currently offered in Fiji," said Babu.

"The courses are for people who have already completed their undergraduate studies in engineering or Information Technology but want to upgrade their knowledge in other software."
"Even students in their final year of Bachelor's programme can attempt the courses as it will greatly assist them in meeting the industry standards," he added.

The MG-CEIT will offer four programmes which are Certificate Course in Java Programming (CCJP), Certificate Course in Software Testing (CCST), Certificate Course in Network Security (CCNS) and Certificate Course in Database Management (CCDM).

"This facility will train professionals to be specialists in different areas related to IT. The courses offered are cutting edge and is far different then what is being currently offered in Fiji," said Babu.

"The courses are for people who have already completed their studies in engineering but want to upgrade their knowledge in other software. "
"Even students in their final year of Bachelor's can attempt the courses as it will greatly assist them in meeting the industry standards," he said.

The skills attained from these courses will enable students to be on par with the latest developments in software. The intensive training course will enable students to gain greater specialized IT knowledge and skill and apply this in their daily work.

Director MG-CEIT, Mukesh Babu.

Semester 2, 2019 commences on Monday 08 July.
Minimum Entry Requirements:
• Completed Bachelor in IT/IS or CS/IS
• Completed Diploma/Trade Diploma in IT, IS with minimum 2 years of work experience
Location
The programme is only offered at the Derrick Campus in Samabula. All classes are taught face to face.
