Voni aims to groom future leaders

Knowledge sharing and the opportunity to mould students to become model citizens is the foundation of Ilikini Voni's desire to become a teacher.

Ilikini Voni after completing his enrolment at the FNU booth at MHCC, Suva.

Voni enrolled in the Bachelor of Education (Secondary) programme offered by the Fiji National University's (FNU) College of Humanities and Education (CHE) majoring in English and itaukei.

The former Bhawani Dayal Arya College student said he was determined to enter the noble profession of teaching.

He said learning and sharing knowledge is his passion.

"I am excited to begin my university learning and couldn't wait to enrol at FNU. Coming to MHCC this morning was very convenient for me as I was able

to complete my enrolment process here and clarify issues with the FNU staff that are present," Voni said with excitement.

"I believe that teachers play an important role in society as they impart knowledge and skills to students who will then use it to become productive citizens."

"Our teachers teach those who become doctors, pilots, engineers, scientists, nurses, artists and drive the workforce of tomorrow so one day I will also be a qualified graduate of this profession."

Voni, who hails from Nakalou Village in Macuata, Vanua Levu, said he chose to study at FNU due to its reputation of producing highly-skilled graduates.

"I know that FNU will provide me with the quality education I need. I will be based at the Natabua Campus and will be staying with a family member in Lautoka to make it easy for me to attend lectures and tutorials," he said.

"The practical component of the programme means I will be placed on attachment at a school to get first-hand experience of being in a classroom and that is something that I am also looking forward to."

"A few classmates and friends are doing similar courses at FNU campuses so we will be able to experience university life together." Voni starts his studies at FNU in two weeks.
